The app's developer made sure to include all the features you'd expect from a torrent client, like magnet link support, bandwidth limiting, and IP filtering. Plus, by choosing between beginner, intermediate and advanced interfaces, you can show or hide advanced features like proxy usage and per-file peer filtering. Vuze also has a number of traits that help it to stand out. First, it supports RSS subscriptions and will automatically download new torrents as they're added to a feed. Next, the Vuze Remote web app lets you manage your downloads from any computer or smartphone. Finally, a metasearch will take any query and run it through a database of popular torrent sites. Add to that a robust rating and comments system, and you're sure to find the song you're looking for. Once users get used to the wide range of features, Vuze is sure to become their go-to program for downloading new music. It's completely free, with no ads or hidden fees, and 100% open-source. When it comes to exchanging files online, this transparency can give you some extra piece of mind. There are a number of handy features here for finding and downloading music. For example, the search feature supports user-made plugins to expand its capabilities and search the most popular torrent sites. This also means you can stay away from pirate sites, which certain ISPs monitor. Like Vuze, qBittorrent also lets you manage your downloads remotely by setting up a WebUI. You'll need to select a port and enter your IP address each time you want to connect. qBittorrent is great for beginners or users looking for a simple interface without any bells and whistles, and is free of pesky advertising. Read our full qBittorrent review(Image credit: FrostWire)An old-school peer-to-peer client that searches multiple sourcesFrostWire combines two powerful methods for downloading new music: peer-to-peer (P2P) torrent sharing, and cloud-based downloads. FrostWire is a fork, or off-shoot, of LimeWire, created after the latter imposed stricter sharing protocols for audio files. Since that time, it has gone through numerous evolutions, and several useful features have been added.An easy-to-use search bar connects you to a large P2P network of users sharing content as well as cloud-based sources like SoundCloud and Archive.org. Once you have your search results, you can check you're getting the right file by streaming directly from the cloud source or by previewing torrents before they finish. Plus, you can easily navigate the file directory of any torrent and select which audio files to download, saving you both bandwidth and disk space. A built-in media library and player makes managing, growing, and enjoying your music collection a breeze. For users looking to leverage both torrent and cloud-based downloads, this is the program for you.Discover how to download YouTube videos Daniel Kaluuya in "Judas and the Black Messiah"; Rachel Sennott in "Shiva Baby"; Emily Blunt and Noah Jupe in "A Quiet Place Part II"; and Yuh-Jung Yoon in "Minari." Photo Courtesy: Warner Bros/Utopia/Paramo We've already talked about some of the best and most talked-about shows of 2021. Now comes the time to delve into movies with our list of some of the best titles of the year. Bear in mind that this list will be updated as more and more new films are released.The pandemic has changed the release calendar of a few of these movies, many of which were initially planned for 2020. Also, the latest edition of the Oscars and other awards competitions made certain 2021 films eligible if they were released in the first two months of the year, which is why a few of the titles here will sound familiar. Some of them have been past award frontrunners or even winners. Here are some of my favorite films of 2021 so far. Carey Mulligan in "Promising Young Woman." Photo Courtesy: Focus Features Emerald Fennell writes and directs this revenge tale that stars Carey Mulligan as Cassie, a former Promising Young Woman whose career as a doctor and personal life got derailed after a tragic event. Fennell went on to win the Best Original Screenplay Oscar for this movie and she also received a nomination for her directorial work. The movie carries a powerful message about consent and raises awareness about mental health. It also features a killer soundtrack and a very deliberate aesthetic accented in candy pink.Promising Young Woman opened in theaters and video on demand (VOD). It's available on VOD now for \$5.99. Photo Courtesy: IFC Films We included this documentary in a recent article about current films and TV shows that can teach us a lot about Black history in America. MLK/FBI establishes the quasi-obsession FBI director J. Edgar Hoover had with civil rights activist Martin Luther King Jr. throughout the '50s and '60s. Hoover collected salacious and sexual material on King obtained through surveillance. The intent was to damage King's reputation. But the documentary points out how, despite tracking King so closely, the FBI was unable to warn the Baptist minister about the threats on his life.MLK/FBI opened in theaters and VOD on January 15. You can rent it now for \$4.99. Darrell Britt-Gibson, Daniel Kaluuya, LaKeith Stanfield in "Judas and the Black Messiah." Photo Courtesy: Warner Bros. Also included in our list of films that can teach us about Black history in America is this story based on true events. Judas and the Black Messiah stars Daniel Kaluuya as chairman of the Illinois chapter of the Black Panther Party, Fred Hampton, and LaKeith Stanfield as the FBI informant Bill O'Neal. Both Kaluuya and Stanfield received Oscar nominations for their roles here and Kaluuya ended up winning. The movie was produced by Ryan Coogler (Black Panther) and directed by Shaka King; it won a second Oscar for its original song "Fight for You." The film depicts O'Neal's infiltration of the Black Panther Party and the assassination of Hampton, in the wake of close FBI surveillance. Judas and the Black Messiah premiered simultaneously in theaters and HBO Max on February 21. It was available to stream on HBO Max for 31 days after that and can now be rented on Amazon, iTunes and other platforms for \$5.99. Alan S. Kim and Steven Yeun in "Minari." Photo Courtesy: A24 Another past Oscar contender on the list, Minari tells the story of a Korean American family relocating from California to a farm in Arkansas in the '80s. Actress Yuh-Jung Yoon, who plays a not-so-typical grandmother, made history by becoming the first Korean performer to win an Oscar in an acting category.The movie also showed once more that Steven Yeun has many more facets as an actor than just being a zombie fighter. And it made young actor Alan S. Kim a star. The eight-year-old won the Critics Choice Award for Best Young Actor/Actress for his role in this movie. Minari opened in theaters on February 12 and was available on video on demand on February 26, 2021. You can rent it for \$5.99. Olivia Colman and Anthony Hopkins in "Minari." Photo Courtesy: Sony Pictures Classics Anthony Hopkins plays Anthony, an 80-year-old with dementia who is set in his ways. Olivia Colman is Anne, Anthony's daughter. She tries to figure out how to provide care for her dad, who no longer seems to be able to live alone. Filmmaker Florian Zeller, who directed and co-wrote this movie based on his own play, tells this story from Anthony's perspective even though he's no longer the most reliable of narrators. The Father won an Oscar for Adapted Screenplay and a second surprise win occurred in the Best Actor race due to Hopkins' performance. The late actor Chadwick Boseman was the favorite in the category for his role in Ma Rainey's Black Bottom, but Hopkins sure gives a masterful performance here as the independent Anthony. The Father is available on video on demand for \$5.99. Photo Courtesy: Apple TV+ This documentary about singer-songwriter Billie Eilish offers an intimate perspective of the artist at 17. Filmmaker R.J. Cutler shows Eilish's childhood home; the places where she composed and recorded with her older brother, FINNEAS; how she got her driver's license... The documentarian also follows her on tour while she's promoting her debut album "When We All Fall Asleep, Where Do We Go?"The film makes a point to reveal the duality of such an international pop sensation who, at the end of the day, is just a teenager coming of age and coping with the same things we've all been confronted with at that age.Billie Eilish: The World's a Little Blurry is available on Apple TV+. It was released on February 26. Rachel Sennott in "Shiva Baby." Photo Courtesy: Utopia Emma Seligman writes and directs this sharp comedy about a bisexual Jewish woman, Danielle (Rachel Sennott), who unwillingly attends a shiva with her parents. She doesn't know who died, she's overwhelmed by her very large extended family, she's mortified that everyone keeps asking about her studies... Plus her ex Maya (Molly Gordon) shows up, representing everything that's good, promising and composed in life. And her sugar daddy, Max (Danny DeFerrari), also pops up and he turns out to be a former colleague of her dad and very much married. Shiva Baby is available on video on demand for \$5.99. This animated feature, which features the voice talent of Olivia Colman, Maya Rudolph, Abbi Jacobson and Danny McBride follows a somewhat dysfunctional family as they embark on a road trip across the country while driving older daughter Katie (Jacobson) to college. The Mitchells end up in an unlikely battle against an army of robots who've decided to rebel against humanity. While funny and heartwarming, The Mitchells vs. The Machines also makes a stand on the absurdity of what a "normal" family is supposed to look like. Plus you can also view it as a commentary on our dependence on technology that's definitely much more positive than any episode of Black Mirror. The Mitchells vs. The Machines is available on Netflix, it was released on April 30, 2021. Emily Blunt in "A Quiet Place Part II." Photo Courtesy: Paramount Pictures I'm well aware of the fact that A Quiet Place Part II is on this list just because it's the first movie I saw in a movie theater after 14 months of cinema deprivation caused by the pandemic. But the fact is that John Krasinski's sequel about a post-apocalyptic world overrun by monsters makes for the perfect cinematic back-to-the-movies experience.And while this movie isn't as quiet as the first one, I guess that explains why the filmmakers didn't go with the title A Quieter Place, it still is very much a nail-biter story with enough silences and tension to keep you at the edge of your seat. I didn't feel it suffered from any sequel bloat and it actually made me wish for a third movie in the franchise. A Quiet Place Part II opened exclusively in theaters on May 28. And there have been many other interesting movies so far this year. The animated feature Raya and the Last Dragon on Disney+ made a case for more Southeast Asian representation and warrior princesses. Netflix kept us engrossed with a lot of titles. The Dig is based on real events; it stars Carey Mulligan and Ralph Fiennes, and it tells the story of an archeological excavation on the brink of WWII. Concrete Cowboy has Stranger Things' Caleb McLaughlin as the young Cole and Idris Elba playing his father. The urban tale depicts the Philadelphia Black cowboy culture. And then there is I Care a Lot, in which Rosamund Pike plays Maria, a heartless legal guardian who goes toe to toe with Peter Dinklage's Roman. You won't see its ending coming. Robin Wright made her directorial feature debut with Land, in which she also stars. She plays a woman who retreats to a cabin in Wyoming and learns a valuable lesson on how to live in the wilderness.And it's difficult to know how to classify Framing Britney Spears, since it's part of the FX documentary series The New York Times Presents. But this episode dedicated to pop star Britney Spears, available on Hulu, sure captured our attention and changed how a lot of us perceived the artist. It also makes for the perfect watching companion to Billie Eilish: The World's a Little Blurry.If you liked 2020's Never Rarely Sometimes Always and the definitely lighter Unpregnant, you should check out Hulu's Plan B. It's certainly raunchier than the previous two movies, but it delves once again into access to contraception and abortion services for underage women who are forced to sometimes travel hundreds of miles or even across state lines to receive this healthcare. And let's add to the list of other very interesting 2021 films Mona Fastvold's The World to Come. It stars Katherine Waterston and Vanessa Kirby as two women in mid-19th century America who live in isolation with their respective husbands but find each other, form a friendship and end up in a romantic relationship.Need more ideas for films to watch?
