Something went wrong. Wait a moment and try again. Has it ever happened to you that you found an interesting video on Instagram, Facebook, or Reddit but you're not able to download and share it with friends or family? This happens because either the video is not publicly available or you can't share it without signing into these social media applications. Well, if you want a way out of such a situation, here are some of the best and easiest video downloader apps and platforms for Android and iOS as well as desktop. One important thing to keep in mind is when downloading and sharing, please don't forget to credit the owner of the video, especially if you are sharing it on a public page. 5 Alternative Ways to Download Instagram Videos 1. Friendly Social Browser Friendly Social Browser is an all-in-one social media application that works on iPhone, iPad, and Android devices. It enables you to access all your social media profiles like Facebook, Instagram, Twitter, and Reddit, etc. and has built-in features to download images and videos to watch later. The app is also good at offering privacy features like blocking advertisements, content trackers, and other online trackers that you probably don't care about, but should. Friendly Social For iOS Friendly Social For Android 2. Social Downloader Social Downloaderis a very straightforward application through which you can easily download images and videos from Instagram, Facebook, and WhatsApp with just a single click. This is a lightweight application meaning that it works wonderfully for those three applications mentioned, however, there isn't much fluff when it comes to other fancy features. So, if you are looking for a minimalist app that does the job, be sure to give Social Download a chance. Social Downloader for Android 3. Universal Downloader Universal Downloader is a free media downloader that works on Facebook, Instagram, and other social media platforms. All downloaded videos are of the highest quality available and you can choose whether to save the videos on your device's internal memory or the SD card. According to the reviews, the downloads are pretty fast and the app never crashes or stops working. Universal Downloader for Android 4. Regrann Regrann is a reposting application for Instagram. That's right. Because, unlike other social media networks where you can simply click on the Share button to repost a photo or video on your page (or just by copy/pasting the link), Instagram doesn't really have this feature outside of sharing reels on your Story. With Regrann, however, you can save and repost a photo or video directly to your feed. And with Regrann Pro, you can even schedule posts. 5. Repost for Instagram Repost for Instagram' is another reposter application for Instagram. However, unlike Regrann, you don't have to first downloadd the content and repost it. Instead, you can directly share the post with one click. What is even more interesting about this app is that you have the option to give credit to the video or photo that you are sharing — which is always a good thing! Repost for Instagram for iOS 6. Fastsave Fastsave is a photo and video downloader for Facebook, Instagram, Twitter, and other social media platforms and works for both iOS and Android. It supports multiple languages, works even the macOS, and has all the features you need to save and repost social media content. One great feature of the app is that you can secure it by enabling a passcode for it. For ease of use, it has dark and light modes too. And the best part is, it is absolutely free! Fastsave for iOS Fastsave for Android 7. Pure All Video Downloader Pure All Video Downloader is a multipurpose Android app that enables you to download videos of any length and quality from Instagram, Facebook, Twitter, Vimeo, Daily Motion, and other platforms that host videos. One of its unique features is that it allows you to choose the video resolution of your downloads - from 480p and 720p to the maximum resolution. It also has a built-in feature to convert videos to MP3 when you want to download just the audio. Pure All Video Downloader for Android 8. All Downloader All Downloader enables you to download all videos from any platform. Be it Instagram, IGTV, TikTok, Tumblr, Reddit, Facebook, YouTube, Vimeo, and many more. It works in a way that you copy the link of the video you want to download, paste it into the app, and click the download button - that's it! But if you use the built-in browser to browse your social media platforms, then the app will detect the videos itself and will allow you to download the videos with just a single tap. All Downloader for Android 9. Redv.co Reddit video downloader, Redv.co, is so far the easiest downloader I've encountered. Since not many apps or platforms can download videos from Reddit, this one is a gem to have in your bookmarks. Basically, you just copy the URL of the page on Reddit and paste it on the website — which works on your native web browser both for desktop and mobile. But if you don't want to go through all this copying and pasting of the link, then there's another option that you can try. Simply edit the URL directly from your browser from reddit.com/r/videos/exampleonly to redditfcl.com/r/.... This will redirect you to a download page from where you can save the video. That's it! 10. Save the Video Save the Video is an online platform that allows you to download videos from practically every website that hosts videos. From Instagram, Facebook, Daily Motion, YouTube, Reddit, Vimeo, Twitter, Twitch, TikTok, even Soundcloud - and many more. The best part here is if you are a frequent video downloader, they have a free Chrome extension to make your life easier! With that, our list is complete! Do let us know in the comments if we missed your favorite, or if some of these applications stop working - because social media sites constantly update their code and design, which means a lot of times, these video downloader applications break down as well. But for the list shared above, their developers are active in fixing any bugs. I hope that helps! Hej! Czy komuś udało się odzyskać konto (oprócz Magdaleny)? Mam na myśli osoby, które zostały 'zablokowane' w listopadzie i odzyskały je samodzielnie bez instalowania starszej wersji aplikacji, bo u mnie to nie zadziało. U mnie to już 10 dni. I wydaje mi się, że tym razem oni nic z tym nie chcą robić. Page 2 Cześć, przez miesiąc nie miałam dostępu do konta (gdzieś tu jest jeszcze mój stary wpis w tym wątku), próbowałam prawie wszystkiego - zmiany hasła, ponownej instalacji, usuwania cookies, pisania do instagrama na tym "mrugającym" ekranie. W pewnym momencie myślałam, że została mi tylko opcja pobrania tej starszej niestabilnej wersji. Wiecie co wystarczyło zrobić? Założyć nowe konto na telefonie i w ten sposób odzyskać stare :) Rejestrujecie się, wylogowujecie, a potem logujecie na stare konto. Wtedy prosí o filmik na potwierdzenie tożsamości i ja od razu po nim odzyskałam dostęp. Warto spróbować :) We've detected that JavaScript is disabled in this browser. Please enable JavaScript or switch to a supported browser to continue using twitter.com. You can see a list of supported browsers in our Help Center. Help Center In the latest attempt to take advantage of countries where Pokémon Go is not available, an APK claiming to be the in-demand game secretly targets your phone with porn ads. If you haven't already enabled the new Chrome browser app that blocks all references to Pokémon Go, then you're probably quite familiar with the game that is now one of the most downloaded apps ever, and has a higher average daily use than Facebook and WhatsApp. However, only a limited number of countries actually have access to the game, and more and more people across the world have decided they can't wait any longer. Not just APKs anymore Pokémon Go APKs - which give you access to a mirrored copy of the game - can be downloaded from multiple online sources, but already a number of security issues have arisen from this practice. Just the other day, the security firm Proofpoint highlighted one APK found online that, when downloaded on to a person's phone, would give a hacker a back door into the device and free rein to do what they want with your information. Now, ESET has revealed an even more worrying fake that isn't an APK, but an app found on the official Google Play Store called 'Pokemon Go Ultimate'. (Note the absence of the accented E - a giveaway for fakes.) Once downloaded, the app deliberately locks the person's screen immediately after it's booted up, forcing the user to restart the device. This is difficult, however, given that it's designed to make this impossible without taking out the phone's battery or accessing the (usually hidden) Android Device Manager menu. Two of the fake apps now removed from the Google Play Store. Image via ESET No easy fix Even after this, the problems don't stop. While your phone appears like it's back to normal, malware continues to run in the background, clicking on porn ads. During testing, ESET found that once this fake Pokemon Go Ultimate app has been installed, its name doesn't appear anywhere on the phone. Rather, it shows up as an app called 'PI Network', with an entirely different icon. The discovery of this app on the Google Play Store has further ramifications for Android users, let alone Pokémon Go players, as ESET said this app is the first observation of lockscreen functionality that's successfully landed on Google Play. "It is important to note that from there it just takes one small step to add a ransom message and create the first lockscreen ransomware on Google Play," ESET said. The scareware found after installation of the fake apps. Image via ESET Over 50,000 duped Other fake apps discovered on Google Play called 'Guide & Cheats for Pokemon Go' and 'Install Pokemongo' that contain 'scareware' ads, built to scare users into downloading unnecessary services or fake in-app purchases. All three apps have now been removed from Google Play but, in the short amount of time they were online, up to 50,000 Android users were duped into downloading Install Pokemongo alone. Security firms continue to advise people in countries where the game is not available to download to simply be patient and avoid clearly counterfeit copies.
