There's also a live camera switcher so you can easily control the cameras you're streaming from. The software has support for over 1800 different IP camera models and allows users to separately configure and customize the video properties like orientation, frame rate, coverage area, etc. The software can add up to four cameras at once and lets users view their video feed simultaneously on a single screen. Users can apply effects such as time stamp, night vision and view flip to the videos, which are recorded in resolutions ranging from 240p to 1080p, of each IP camera they have added to the network. Moreover, one can also post them on Facebook and Twitter straight from Photo Booth Pro. Ecam Live If the reason you're looking for a camera software is because you want to live stream your webcam footage on Twitch or anywhere else, Ecam Live might be a good fit for you. If all you want is to take a quick photo, add some quirky distortion effects and filters to it without waiting for a webcam app to load, head straight to Webcam Toy. Choose the Best Webcam Software Well, these are our picks for the top 10 best webcam software you can download right now. The good news is that most of the Windows-compatible webcam apps on this list work easily on Windows 11 as well. And one of the best software suited for the aforesaid task is IP Camera Viewer, a webcam app that will let you monitor and safeguard your home and workplace via IP cameras. It can also function as a virtual camera, allowing folks to use it as an input source in third-party video-conferencing apps. All you need is an HDMI adapter to get started. Q. Pros: Chromakey support Supports DSLRsOne-time license fee Cons: Can be buggyChromakey feature isn't the best in performance Supported Platform: Windows Download SparkoCam: (Free Trial, Paid version starts at \$39) 14. Pros: Supports picture-in-pictureFeature richCustom background support Cons: Can be overwhelming at first Supported Platforms: Windows, Mac and Linux Download OBS Studio: (Free) 15. Basically, if you're looking to start your live streaming journey, you should definitely give Ecam Live a shot. Apart from them, YouTube integration, Picture-in-Picture (PiP) mode and green screen are among the diverse set of goodies that ManyCam has to offer. Videos can be only recorded at a frame rate of 30FPS in three resolutions, which are 360p, HD and Full HD. External webcams have better lenses and electronics, and typically offer better resolutions. JPG and PNG, while videos can be recorded in a wide array of formats such as AVI, MKV, FLV, and WMV to name just a few. With SplitCam, you can easily use your webcam to record yourself, or stream videos. Also make sure that you pick the right software settings, lighting conditions, and background to ensure the best possible results. Windows Camera Though third party webcam apps are quite useful and feature-rich, there's actually a built-in camera app on Windows that you can use. It is available for Windows and Linux systems, but unfortunately, there's no Mac client for now. It is highly popular among streamers and TV broadcasters working from home during the pandemic. One can choose to save the clicked images either locally (only JPG format) or post them directly to social media platforms like Facebook and Twitter straight from the website. The software we included in our list have been selected after an in-depth assessment of their UI, their versatility and ease of usage, not to mention the different requirements of a diverse audience. That said, it's free to download and use, and you should check it out. Is a webcam better than a laptop camera? All you have to do is open the website, select an 'ReadyToSmile!' button followed by clicking on the 'Use my Camera!' button to get started. If nothing works, you probably have crappy webcam hardware, so invest in a high-quality external camera and hook it up to your laptop. Pros: Bunch of cool effectsAvailable for free Cons: Only supports JPG and MP4 formatsResolution is quite low Supported Platform: Windows 11, Windows 10 Download Photo Booth Pro (Free) 9. YouCam has it all, and then some more. Looking for a software to record your webcam? You'll realize that Apowersoft's offering has all the tools and options to let you record your screen activity in whichever form or format you like. Camviz Webcam Recorder Camviz Webcam Recorder is one of the simplest webcam apps one can find in the domain, but its only drawback is the fact that it is exclusive to the macOS platform, so users registered on the Windows ecosystem are out of luck. What's more, Movavi screen recorder works on both Windows and Mac, and you can start using it for free. We have tested every single app on this list for compatibility with Windows 11 so you can rest assured that the options on this list that are marked as being compatible with Windows 11 will work without any hiccups. Provided your camera records otherwise high-quality videos, 720p shouldn't be a deal-breaker for a beginner. As is customary with such software, SparkoCam also offers a 'virtual webcam' feature that enables users to share their video clips through various chat applications even without a real webcam. The PC client, however, works with Zoom, MS Teams, Skype and most other programs. Configuration options include adding new sources, duplicating existing ones, and adjusting their properties easily. Thanks to its vast portfolio of editing tools and effects, ManyCam is a highly recommended option, be it for creating tutorials, recording screen activity or live streaming. In my opinion, Apowersoft's webcam software is an ideal choice for clicking images, recording audio files and capturing videos. Apart from that, the software supports overlays, filters and scenes, comment streams, and more. Is a 720p webcam good enough? You can choose to record videos in a wide array of resolutions (240p, 480p, HD, FullHD, etc.) at frame rates ranging from 5-60 FPS in numerous formats like MP4, MKV and FLV to name a few. You can use both Android smartphones and iPhones as your streaming webcam. Further, the app features live text overlays, and support for vertical video capture which means you can easily use this for 9:16 aspect ratio webcam recordings or streaming. Pros: Minimal designComes built in with WindowsSupports up to 1080p resolution Cons: Only 30FPS supportNot as feature rich as other apps on this list Supported Platform: Windows 10 Download Windows Camera (Free) 13. The major drawback of this software, at least for us, is the fact that it's not integrated with popular social media platforms like Facebook and Instagram. The software can record videos in three resolutions viz. 360p, 480p, and 720p, whose properties (contrast, saturation, sharpness, etc.) can be manually adjusted. Pros: Support for 4K videosNo watermark in free versionComes with screen recording and casting features Cons: Requires manual adjustments for featuresBusiness plans are expensive Supported platforms: Windows 11 (likely), Windows 10, Windows 8, Windows 8.1, macOS 10.9 and higher, including macOS 12 Monterey. Most webcams have a USB cable attached to them. Users have the flexibility to record screen activity in three aspect ratios (11: 9, 16:3, 4:3) in resolutions ranging from as low as 144p to HD, however, frame rate appears to be fixed at 30FPS at all resolutions. The Apowersoft Free Online Screen Recorder saves images in numerous formats (PNG, JPG, BMP, etc.), while videos can be recorded at frame rate values ranging between 5-60 FPS in a wide array of file types such as MP4, WMV, AVI and FLV among others. When it comes to image editing, you don't have variable like saturation or vibrancy to play with, as all that is handled by the software itself, and all you have to do is move a slider to adjust the image quality in percentage. A peek inside the software's settings menu reveals that Camviz also comes with some additional nifty features such as Motion Detection, Remote Webcam, and Screen Cam capture to name a few. B&W, Sepia, and Negative. Scene filters, face distortion lenses, emoticons, dynamic effects, and stickers are just a few of them. The free trial period lasts only 30 days, after which you'll have to purchase a paid version. SparkoCam Virtual Webcam SparkoCam is a webcam and video effects software for broadcasting and applying live webcam effects to your video chats and recordings. This webcam app is meant to be a live streaming app for Windows and Mac. The only downside? There are many ways to improve the image and recording quality of your laptop webcam, the most important of which is updating your imaging software to the latest version. Keeping in mind the aforesaid points, we have compiled a list of the 15 best webcam software for Windows and Mac (laptops and desktops) that stand out on certain parameters, be it their slick user interface, the diversity of editing tools, ease of usage, or other key features. Pros: Completely free without any watermarksEasy to useMotion detection feature Cons: Lacking in effects and features Supported Platforms: Windows 10, 8, 7, Vista, XP Download (Free) 6. Plus, there's support for Chroma Key (green screen) for even better webcam streaming and recording. In that case, go to the webcam manufacturer's website and download the drivers and custom configuration software. It also comes with a bunch of cool effects that you can apply to make your webcam video look more appealing and interesting. The app also comes with integrations for YouTube Live, Facebook Live, and Twitch (with OBS, or XSplit). Once you install the app on your iPhone, you will have to install the "DroidCam Webcam" PC client on your laptop or desktop PC. Generic drivers are almost always pre-installed, but some high-end webcams may ship with custom software for better results. The aforementioned DroidCam app is also available on iOS (freemium), so you can use your iPhone as a webcam for your computer. When it comes to technical aspects, Debut Video Capture provides a considerable amount of control to users. ManyCam ManyCam is not just simply a webcam app, instead, it can be called a full-blown video-editing software, thanks to the plethora of presets, filters and effects which are available at the disposal of users. Microsoft's web-cam app can capture photos in two aspect ratios viz.16:9 and 4:3, and comes with four framing grid options which include crosshairs and Golden Ratio among others. Burst shot is also on the table, and users can manually adjust the shutter speed to their liking. How can I use my Android phone as a webcam for streaming? Download ManyCam: Free, paid versions starting at \$24 4. All that you get in the name of video editing tools are basic variables like contrast, saturation which can be adjusted by using a slider, and three video filters viz. Some want fancy effects to spice up their video feed, while others want something that can just get the work done. Pros: Supports a wide range of formatsMultiple resolutions are supported Cons: Video editing tools are lacking Supported Platforms: Windows 11(likely), Windows 10, Windows 8, Windows 7, and Mac OS X 10.5 or above, including macOS 12 Monterey. Though the exact method will depend on the software you want to use, you should check out our article on how to use a phone as a webcam to get a detailed, step-by-step guide. If you're looking to start streaming, you can't go wrong with OBS. Hence, with a half-decent aftermarket webcam, you can expect markedly better photos, videos and audio, compared to any built-in webcam in laptop or desktop computers. Despite not being a third-party software with a lot of editing tools and effects, Windows Camera gets the job done as an effective webcam software. Using Webcam Toy is as simple as it can get. You even have the option to record audio files in various formats such as MP3, AAC, FLAC and can also choose from different codecs as per your liking. All recent operating systems, including Windows, macOS and most Linux distros, will recognize the webcam out-of-the-box. For such scenarios, Debut Video Capture is one of the best webcam apps whose clutter-free UI is its biggest USP. Movavi screen recorder can record webcam, screen, mic, and system audio on your computer. It enables users to create scenes made up of multiple sources including window captures, images, text, browser windows, webcams, capture cards and more. Well, in that case, how about face 'Avatars', AR stickers, and live animations to make your video feed look like a well-edited film? This software offers recording of live streaming videos and includes a bunch of features such as support for annotations in recorded videos as well as a built-in video editor to trim videos, add watermarks, and more. However, with a very few exceptions, the quality is almost always absolute rubbish. YouCam can also be synced with services like Skype and Yahoo Messenger, and also supports face login functionality for platforms like Facebook, Amazon, Twitter to name a few. One can capture screenshots on PC in two file types viz. Download Debut Video Capture Software (Free, paid plans start at \$1.66 per month, billed quarterly) 5. Pros: A plethora of cool filtersVirtual webcam Cons: Does not integrate with Facebook and InstagramNot as feature rich as other options Supported Platforms: Windows 11, Windows 10, Windows 8, Windows 7, and Mac OS X 10.5 or above, including macOS 12 Monterey. The Apowersoft offering also boasts of Google Drive and Dropbox integration to let you quickly store your files on the cloud, aside from the option to share them on YouTube and Vimeo. There's also another software from Apower, called ApowerREC (free download) that you can check out. If you can't afford a new high-quality webcam right now, use your iPhone or Android device as your streaming camera. Plug that cable into an available USB port on your laptop or desktop computer. You can also choose to capture burst shots and activate a time lapse mode, that will let you capture multiple shots in succession until the camera button is pressed again. However, it is a nifty little webcam tool that offers a decent feature set. You can also choose to display any image of your liking to the online audience when you go offline. It literally has no cons, except maybe, the lack of multi-stream support. YouCam 9 Deluxe Youcam is one of the most popular webcam software out there, and for a good reason. OBS Studio OBS is a free and open-source webcam software for video recording and live streaming. Like other webcam tools for laptops and desktops, SparkoCam also offers cool webcam effects, graphics and animations to your live video chats and video recordings. The images captured by the camera are saved in three formats viz. JPG, GIF, and PNG, while streams are handled by JavaScript and MJPEG. However, the software is not as bare-bones as it appears, because it offers a couple of quite nifty features such as image-to-movie converter, text/image overlay and a nifty motion detection feature which detects any activity in view of the webcam and sends the user an email notifying them of the same. Pros: Animated effects Seamless integration with apps like Zoom, Teams, etc.AR filtersSupport for YouTube Live, Facebook Live, etc Cons: Free version is quite limited in features Supported Platforms: Windows 11, Windows 10, 8/8.1, 7, Vista SP2 Download YouCam 9 Deluxe: Free 30-day Trial, paid version starting at \$34.99 2. The software also offers the ability to split your single webcam stream to use it simultaneously in multiple applications. We hope that you go through the list and select the one that best suits your needs. While we are on the topic of webcams and webcam apps, if you are looking for something that can help you stream games on platforms like Twitch, you should check out our article on best voice and video chat apps for gamers. The most well-know plugin is probably OBS Live, which is offered by StreamElements. Movavi can record your webcam and system audio without recording a screen; plus you can schedule recordings, take and edit screenshots, and even draw on the video while recording it. How do I connect a webcam to a laptop via USB? Check out Movavi Screen Recorder (Sponsored) 1. It's biggest claim to fame is that it allows high-end Canon and Nikon DSLR cameras to be used as regular webcams. Yawcam — Completely Free Webcam Software If you're looking for a completely free webcam software, look no further than this one. Both are highly expensive, with the latter prohibitively so, especially for starters. Pros: Great for surveillance purposesAllows up to 4 cameras at onceDigital zoom feature for cameras that don't support zoom Cons: Resolution is limited to 720p Supported Platforms: Windows 11 / 10 / 8 / 7 / Vista / XP / 2012 / 2008 Download IP Camera Viewer (Free) 11. Most streamers use OBS Studio, which is among the most feature-filled game recording and streaming software on laptops and desktops. Pros: App is available, but not necessary to downloadOffers quite a lot of flexibilityEdit screen recording with annotations, comments, and more Cons: Doesn't seem to work with multiple monitors Supported Platforms: Windows 11, Windows 10, macOS, Web Use Apowersoft Free Online Screen Recorder: Free 10. Debut Video Capture Software Not all people are big fans of fancy filters and effects, and sometimes we just want a no-frills free webcam software. Overall, given its extensive feature set, developer support and free license, OBS Studio is the possibly the best webcam software on Windows, Mac and Linux laptops and desktops. The software is not only zippy, it also features a host of mirror effects and filters which can be tested in real time before recording a video or clicking a photo. And hey, there is also a cool photo-strip feature that will let you capture four images with different filters and arrange them in a strip, whose layout can be tweaked later on. Upgrading to an external webcam is almost always a good idea, even if you're just starting out as a streamer. Moreover, you can also use Camviz as a virtual webcam for other apps on your macOS device. A clean UI, which is far from the cluttered interface you'll find in other webcam tools, makes YouCam an obvious choice for beginners. IP Camera Viewer Aside from live streaming on Twitch and video chatting, webcams can also play an active role in surveillance. OBS also has a passionate developer community that

creates and maintains plugins, including VST, to further enhance the experience. Ecomm Live also supports multiple cameras, HDMI capture devices, screen sharing from iPhone and Mac, and a lot more. Limitations aside, Camwiz features a very clean UI with all the core recording tools located on the home screen itself, thanks to the simple three row arrangement which contains camera toggle, recorder tools and tuning options. It is a favorite amongst Twitch streamers, offering high performance real time video/audio capturing and mixing. It supports Facebook Live, YouTube Live, Twitch, Twitter, Restream, and even LinkedIn (you know, in case you need that). 16:9 and 4:3, however, resolution and frame rate are fixed at 640 x 360 and 30FPS respectively. Users can also set hotkeys for nearly every sort of action, such as switching between scenes, starting/stopping streams or recordings, muting audio sources, push to talk, and more. But that doesn't mean the software is a barebones affair, instead, it offers a rich array of editing tools, filters, and effects whose diversity is impressive, to say the least. What webcam software do streamers use? You can even adjust the audio bitrate values (between 96-192 kbps) and also apply a noise suppression feature which works quite well. How do I make my laptop camera better? Paired with the right software, you can use the humble webcam to take wide-angle selfies with your friends and family, or even use it for surveillance purposes. SplitCam SplitCam may not be very popular, especially in comparison to names like OBS, Logitech Capture, YouCam, and others on this list. Pros: Night vision, time stamp and other featuresMotion detectionAllows remote access to webcam Cons: Doesn't allow screen recording, unlike other options on this list Supported Platform: macOS 10.9 or later Download Camwiz (Free, with in-app purchase) 12. It also has a virtual camera feature built in, so you can use the software to share your screen or stream content from your computer. It is compatible with apps like Zoom, Skype, and more, but the free version comes with time restrictions and a massive watermark, as you can see. You can add accessories like eyeglasses, hats, hair or masks, all of which will be automatically applied to the video using SparkoCam's face-tracking algorithm. Some of the other software used by professional streamers include XSplit and Wirecast. Most modern laptops and all-in-one (AIO) computers come with integrated webcams. The software also incorporates an intuitive audio mixer with per-source filters such as noise gate, noise suppression, and gain. Apowersoft Free Online Screen Recorder If a fluid interface and vast toolkit is a combination you seek in an app for your webcam, you can never go wrong with Apowersoft Free Online Screen Recorder. Using OBS, users can set up an unlimited number of scenes they can switch between seamlessly via custom transitions. It's feature-rich and powerful and as long as you have a compatible webcam, this app will most likely be the perfect fit. The software's home screen contains just the basic controls, but once you open the settings menu. So, without any delay, let's go through our list of the 15 best webcam software for laptops and desktops, including both free and paid options. Images are saved in JPG format locally and can also be uploaded on OneDrive. Photo Booth Pro When it comes to webcam tools, slow load speed and camera lag are a common issue, but not for Photo Booth Pro. Frequently Asked Questions Q. And yes, you get a watermark tool for that tiny bit of personalization you want to add to your videos. Yawcam is another app for your webcam whose USP is its simple interface, which more than makes up for its lack of fancy effects with its clean approach to present the core camera tools. On the technical side, YouCam saves images in multiple formats (JPG, BMP, PNG) and is capable of recording videos in AVI and WMV (MP4 too, for systems with VGA cards) file types at resolutions ranging from 240p to Full HD. Can I use my iPhone as a Webcam? Sounds generic? On the other hand, videos are recorded in MP4 format in two aspect ratios viz. Well, in that case, Webcam Toy is your best option. Pros: No installation requiredPerfect for quick captures Cons: Not as feature rich as native applications Supported Platform: Web Visit Webcam Toy (Free) 8.
